

Module 5.2 – Using BPA to formulate Recommendations for Enhancing Trade Facilitation

Dr. Somnuk Keretho
Advisory Committee, UNNEExT
Director, iNOVA, Kasetsart University
sk@ku-inova.org

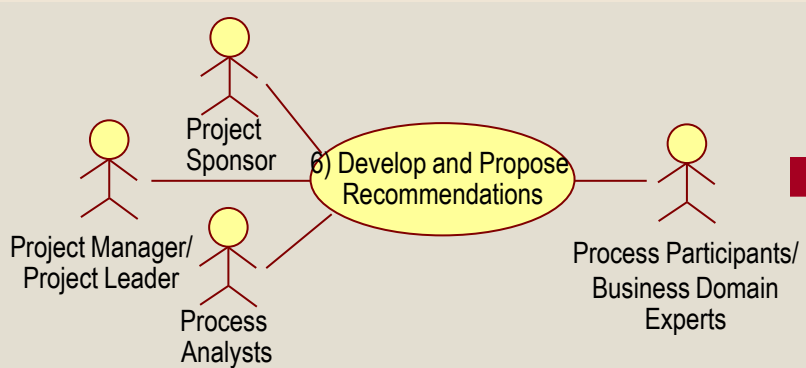

BPA Phases: How to conduct a BPA project

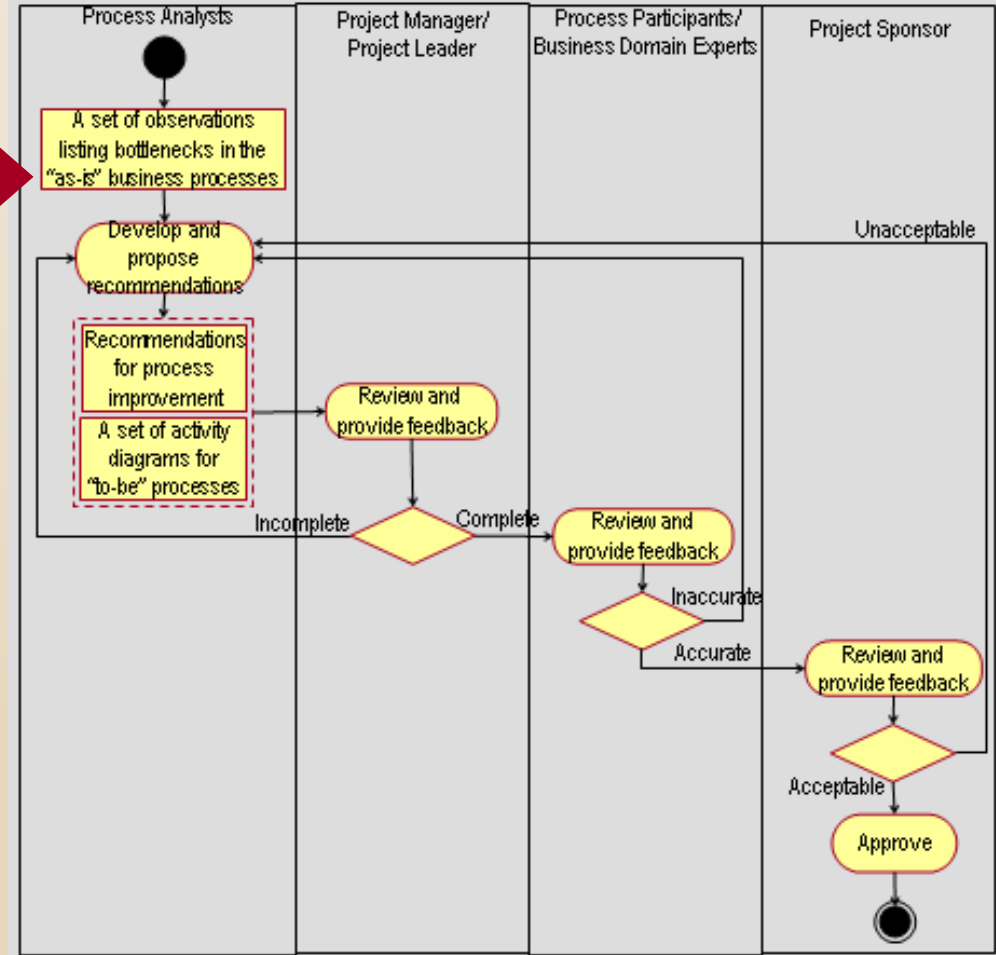

- I. **Scope setting/Planning** – Specify a scope of processes to be analyzed
 - ▶ e.g. import and/or export processes of a specified product, through a certain mode of transportation (trucks, trains, ships or airplanes)...
 - ▶ e.g. planning staffs, tasks, time schedule, other resources to conduct this BPA project,
- II. **Data collection and process documentation** – Acquire information and document a sequence of steps in actual practices & their attributes, e.g.
 - ▶ Who involved (stakeholders/actors)
 - ▶ Procedures and documents required (input to/output forms)
 - ▶ Related rules and regulations
 - ▶ Quantitative indicators, eg. no.of steps, time, cost, time, distance, ...
- III. **Process analysis** – Locate bottlenecks, examine what causes them, and develop measurable and quantitative process indicators (e.g. the number of steps, time and costs required to fulfill those processes)

Recommendation development – Determine how to eliminate each bottleneck, propose and prioritize improvement actions

Developing and Proposing Recommendations for Improvement

Objective – To develop recommendations that help remove bottlenecks and inefficiencies in procedural and documentary requirements

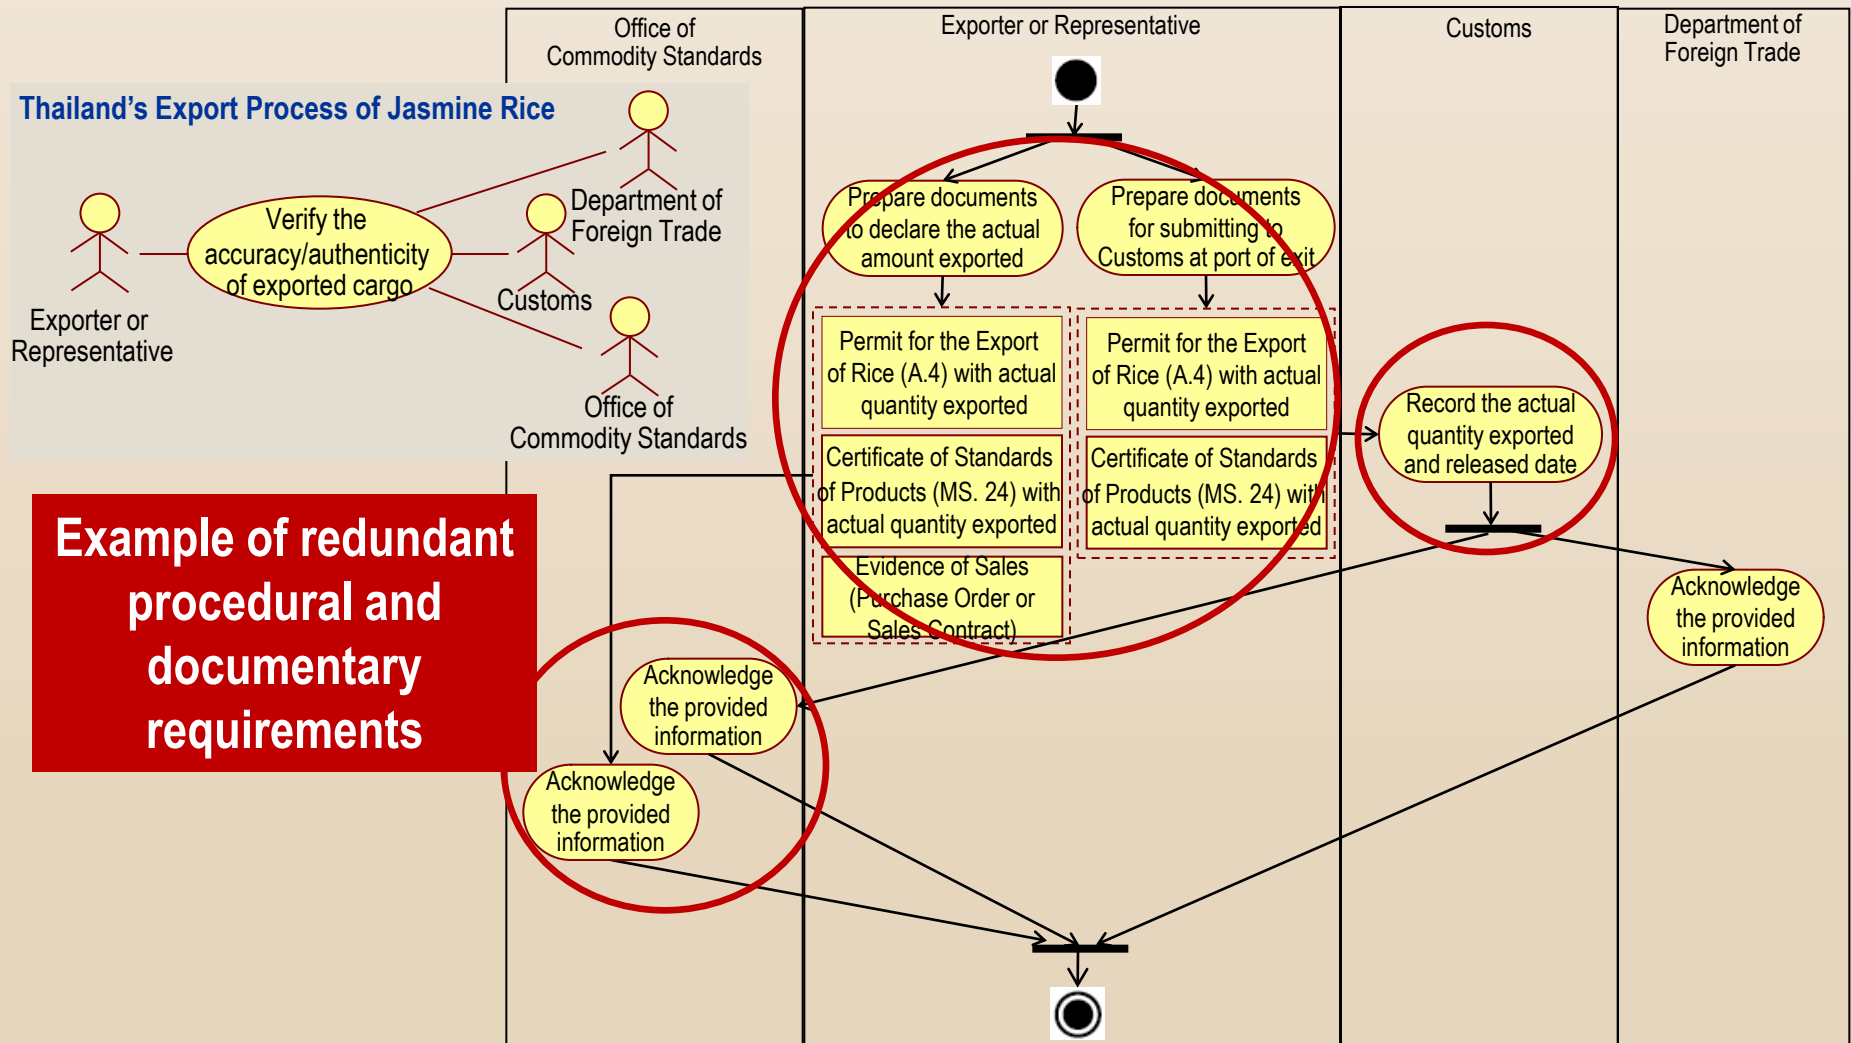

Business Process Simplification and Business Process Automation

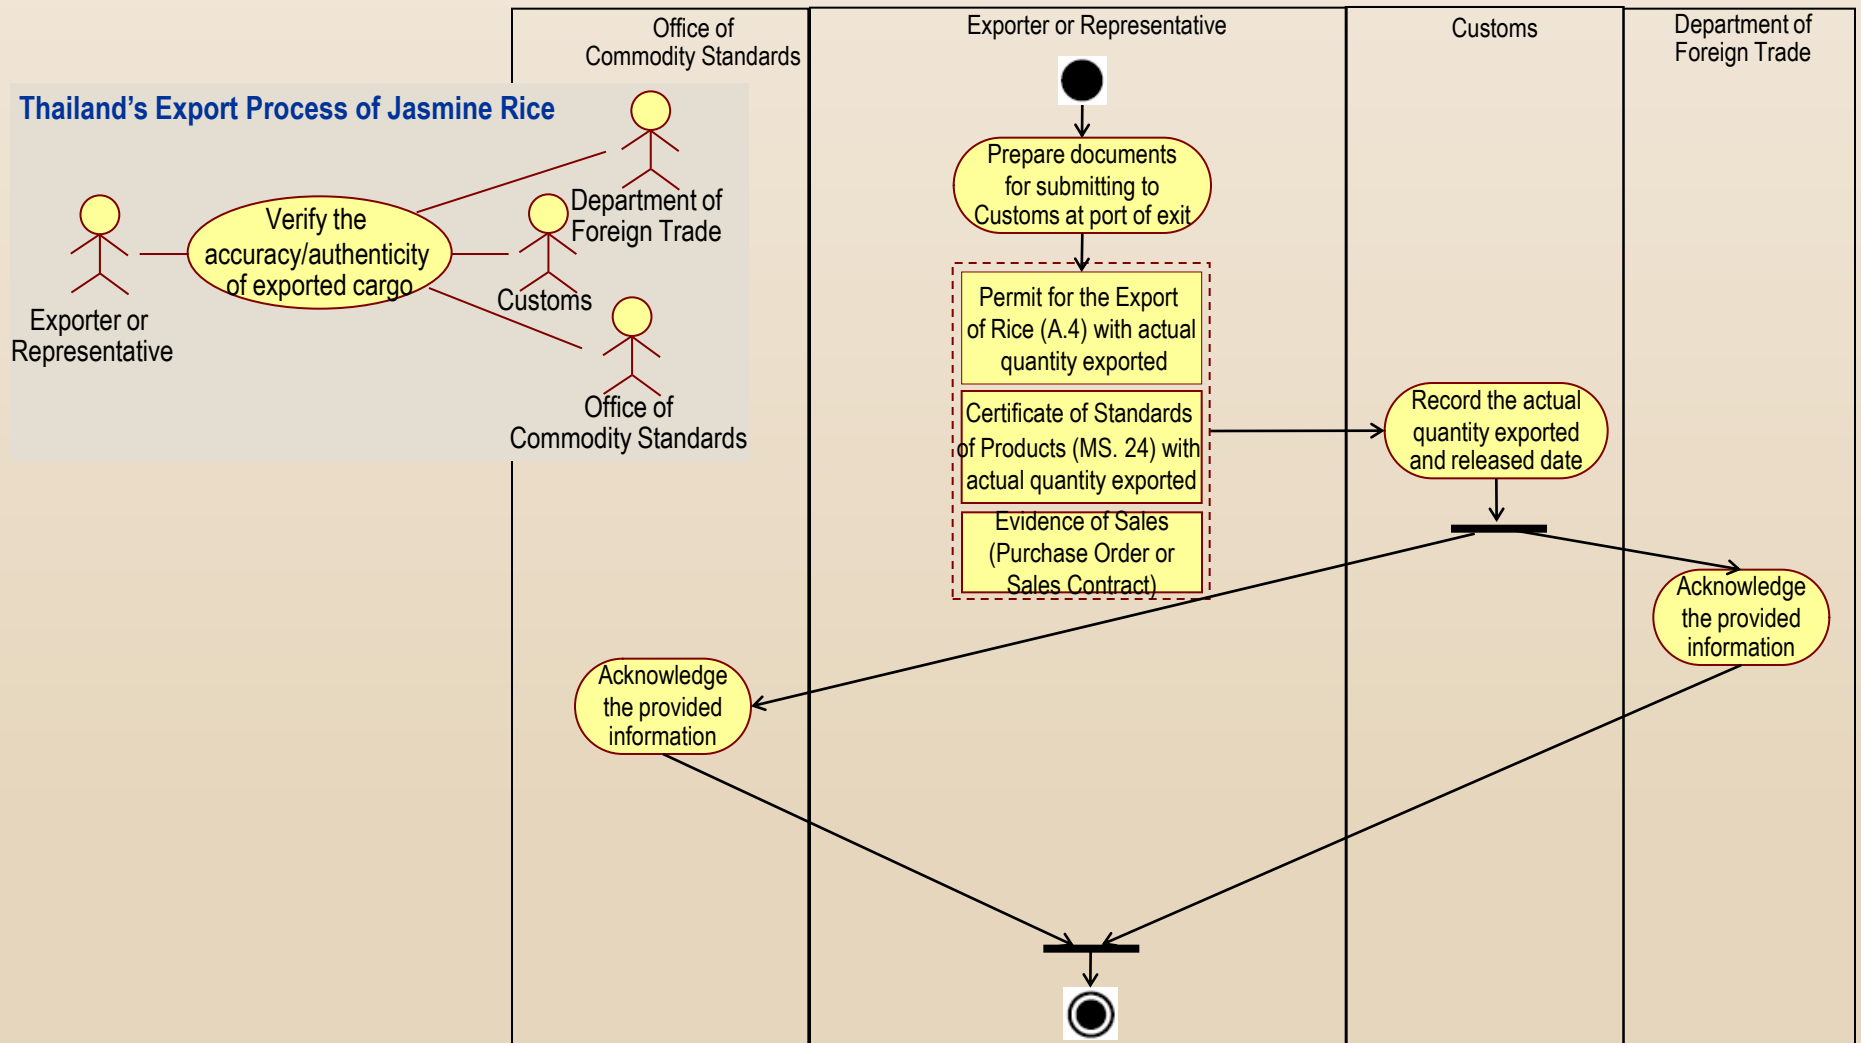

Tips & Techniques

1. **Make** those procedures & document requirements **transparent** and **easy for stakeholders to access to**
2. **Merge some procedures**, and/or **documents(forms)**
3. **Eliminate** redundant procedures and unnecessary documentary requirements
4. **Automate** procedures and promote the sharing of trade and transport data among relevant stakeholders
5. **Modify related laws and regulations** to facilitate the operation of the newly designed business processes
6. **Reform** the regulatory-related organizational structures, etc....

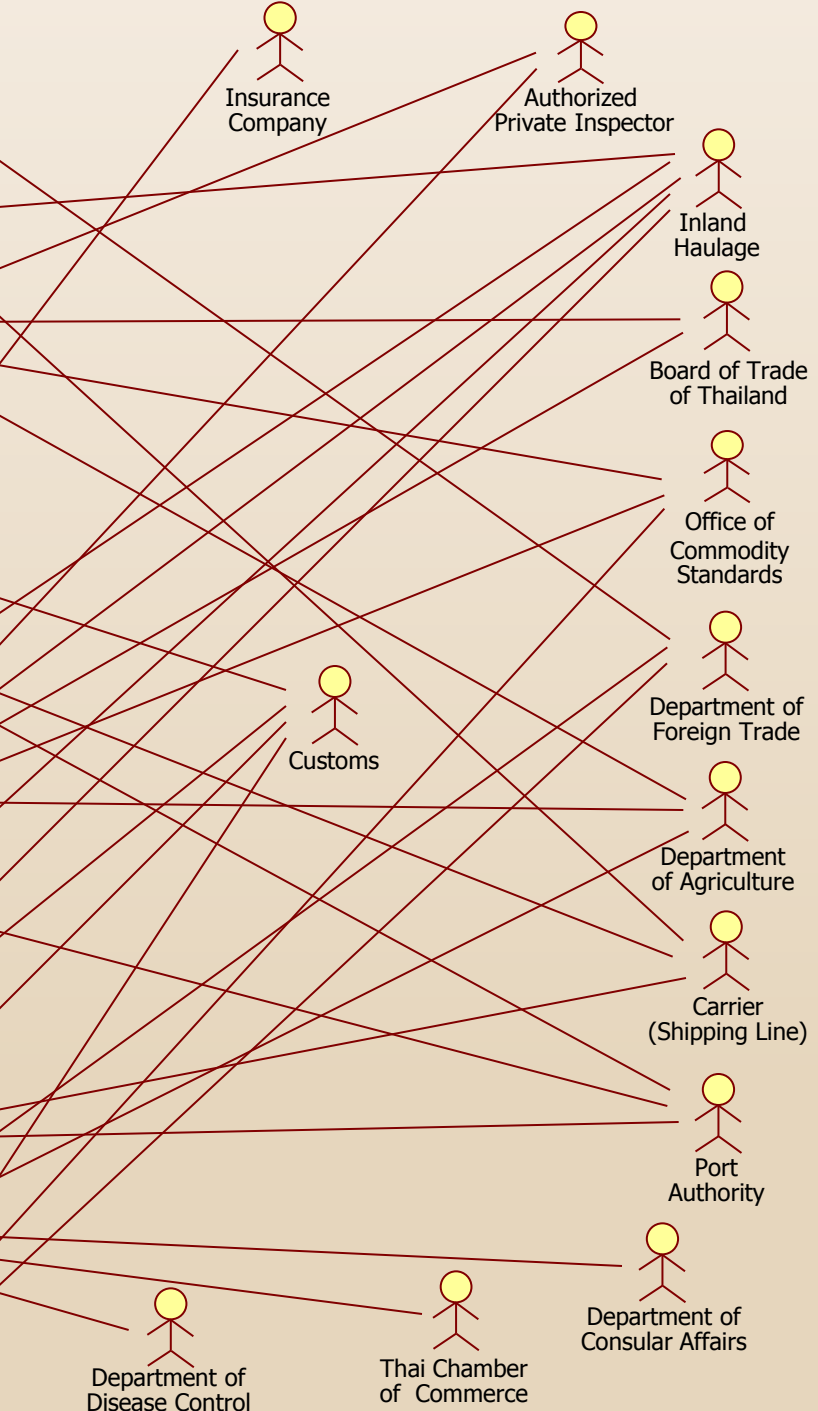

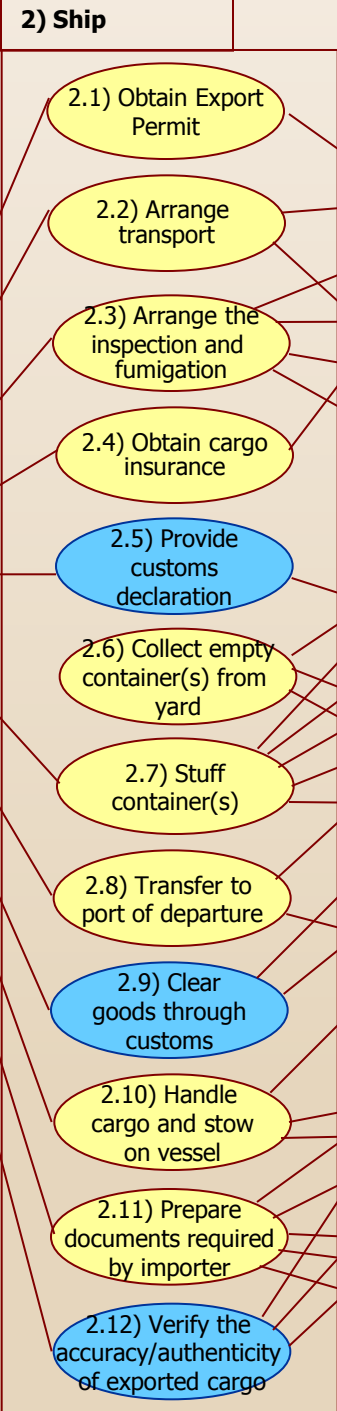

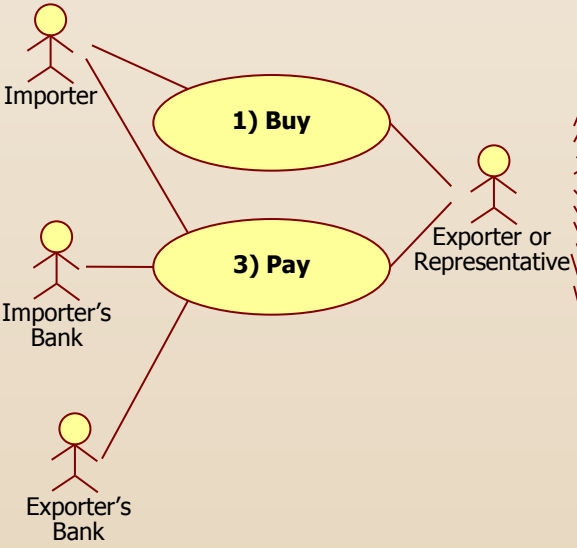

Example: Identify Bottlenecks and Redundancies

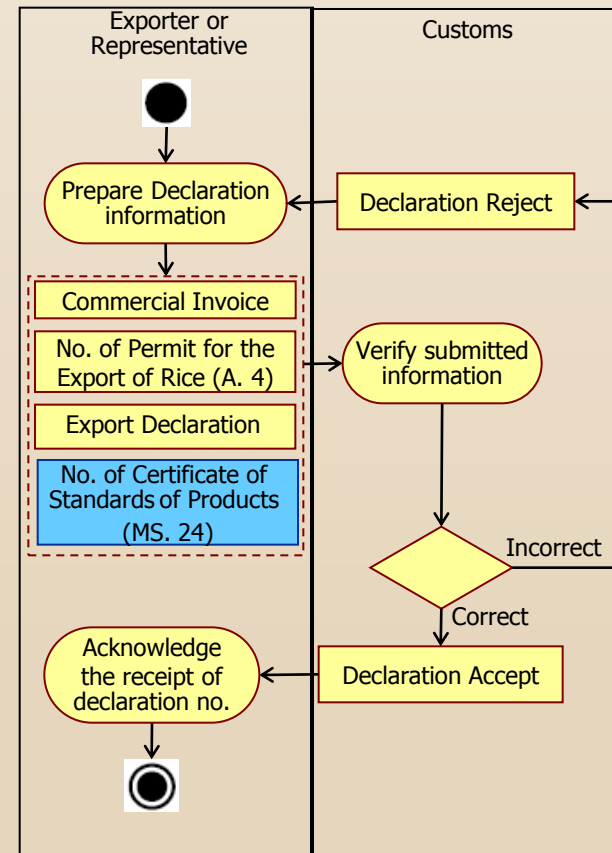

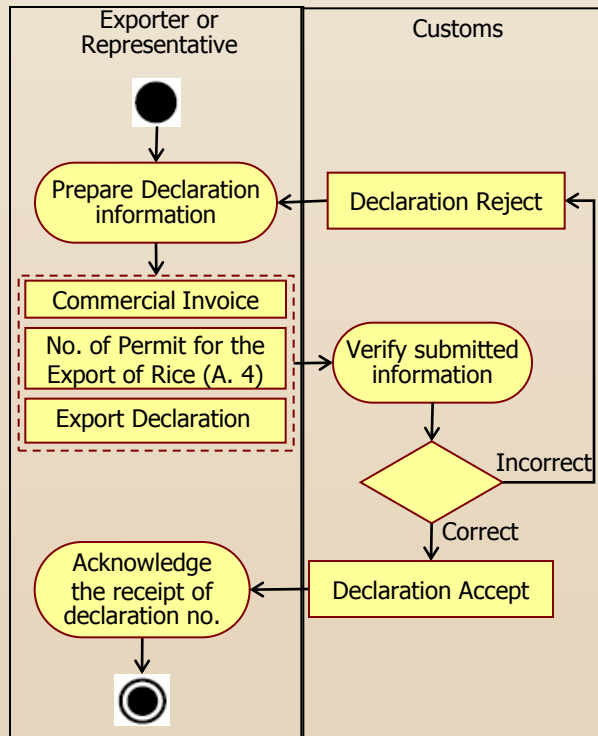

Example I: Remove Redundancies

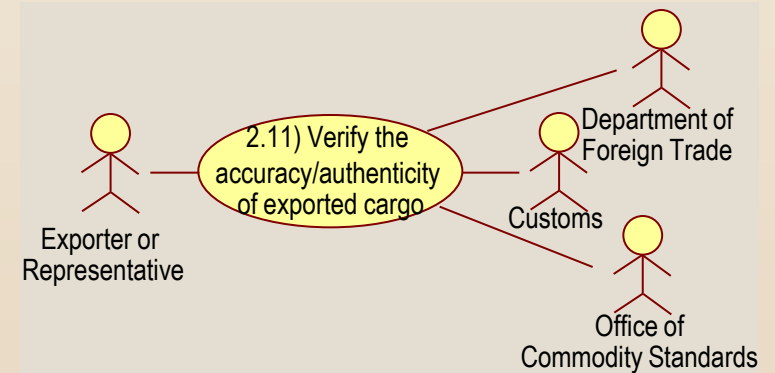

Example II: Simplify, Merge, and Automate Some Processes

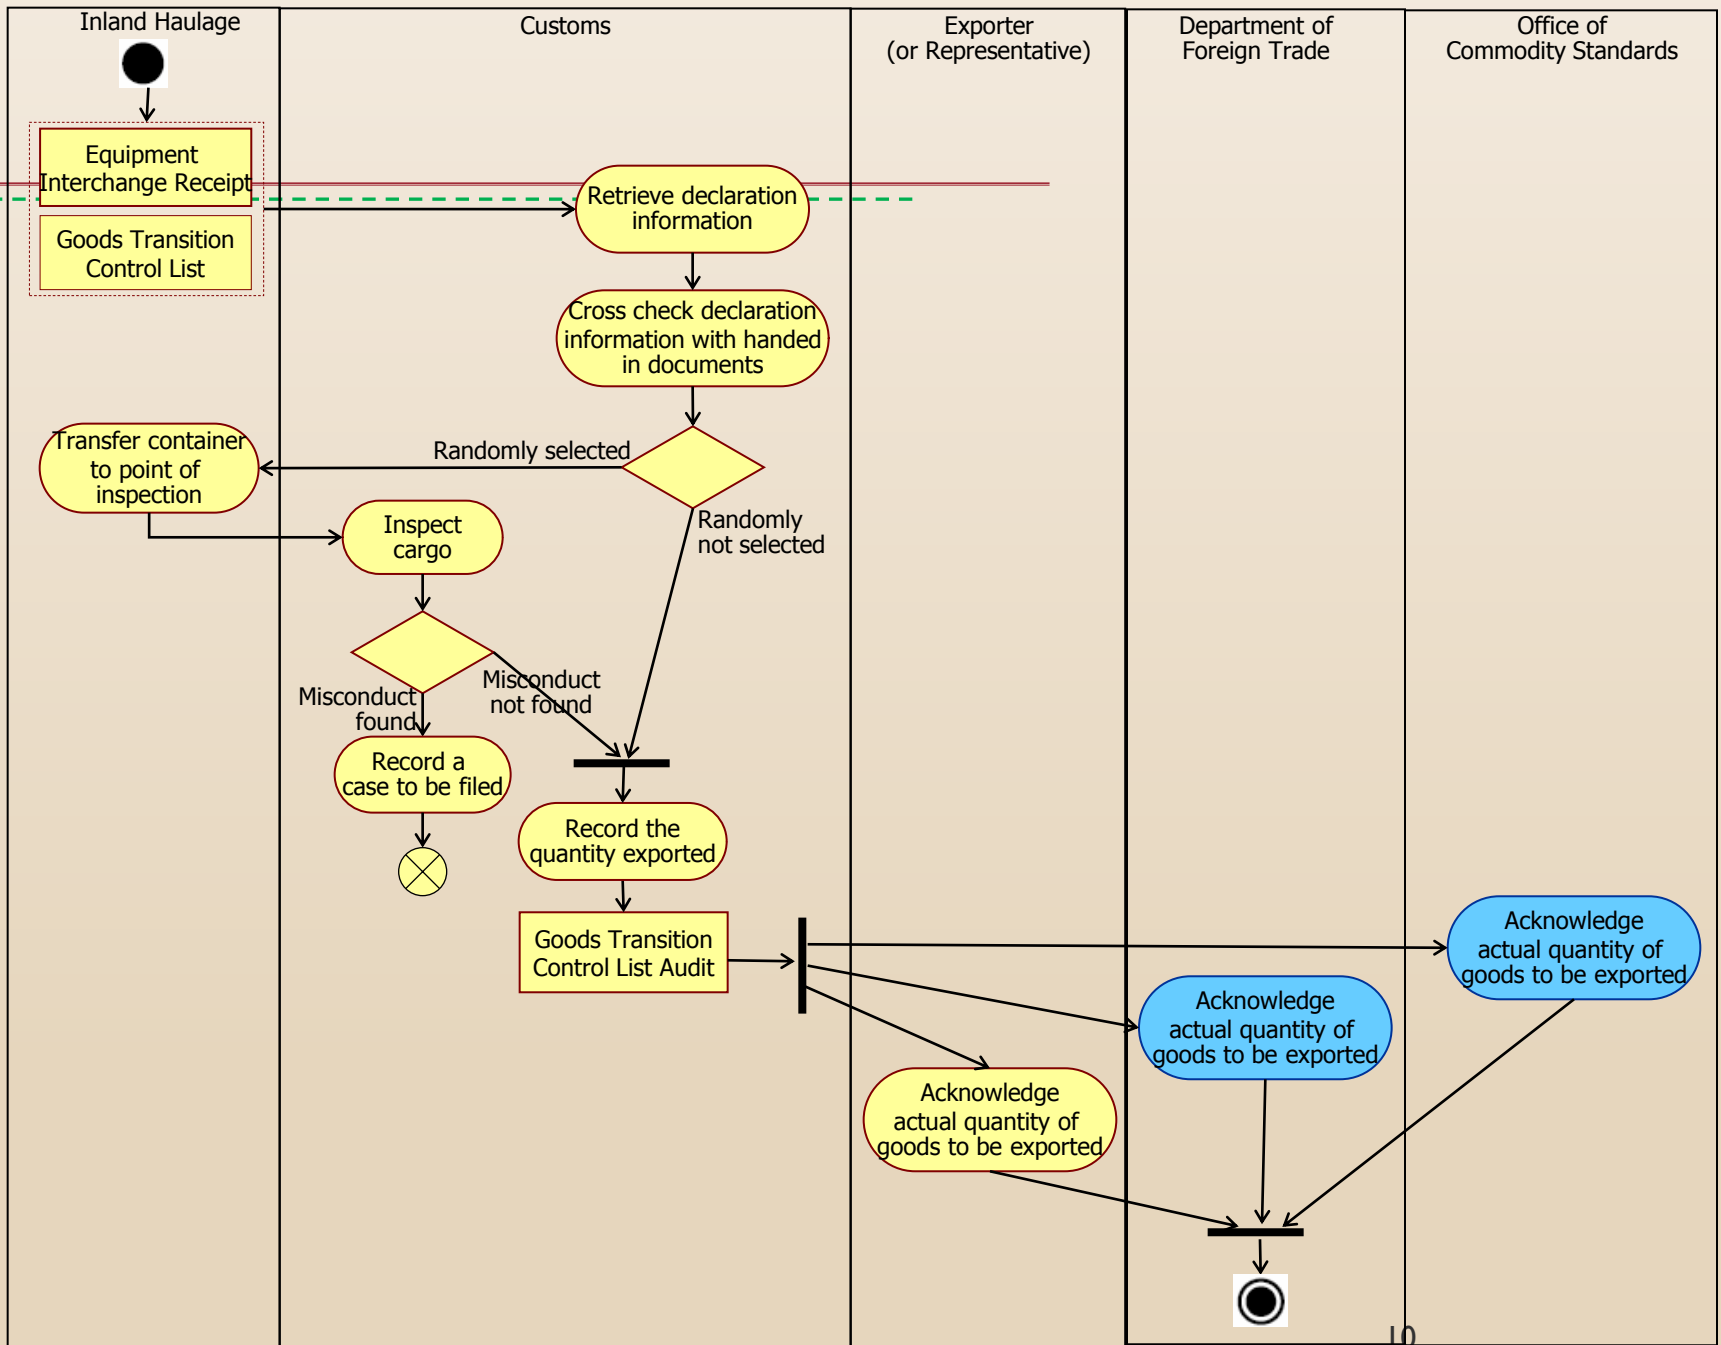

Example II: Simplify, Merge, and Automate Some Processes

Example: Simplify, Merge, and Automate Some Processes

Example: Simplify, Merge, and Automate Some Processes

1. Buy - Conclude sales contract and trade terms
2. Obtain export permit
3. Arrange transport
4. Arrange the inspection and fumigation
5. Obtain cargo insurance
6. Provide customs declaration
7. Collect empty container(s) from yard

8. Stuff container(s)
9. Transfer to port of departure
10. Clear goods through customs
11. Handle container at terminal and stow on vessel
12. Prepare documents required by importer
- ~~13. Verify the accuracy/authenticity of exported cargo~~
14. Pay - Claim payment of goods

Business Process Analysis & Data Harmonization

- ❖ **Step 1:** Capture business processes to identify documents in the information flow

- ▶ UN/CEFACT Modeling Methodology (UMM)
- ▶ Unified Modeling Language (UML)

} BPA

- ❖ **Step 2:** Define each data element extracted from each document in terms of definition, data type, data format, and data constraints in actual operation

- ▶ United Nations Trade Data Elements Directory
- ▶ WCO Data Set
- ▶ UN/CEFACT Core Component Library

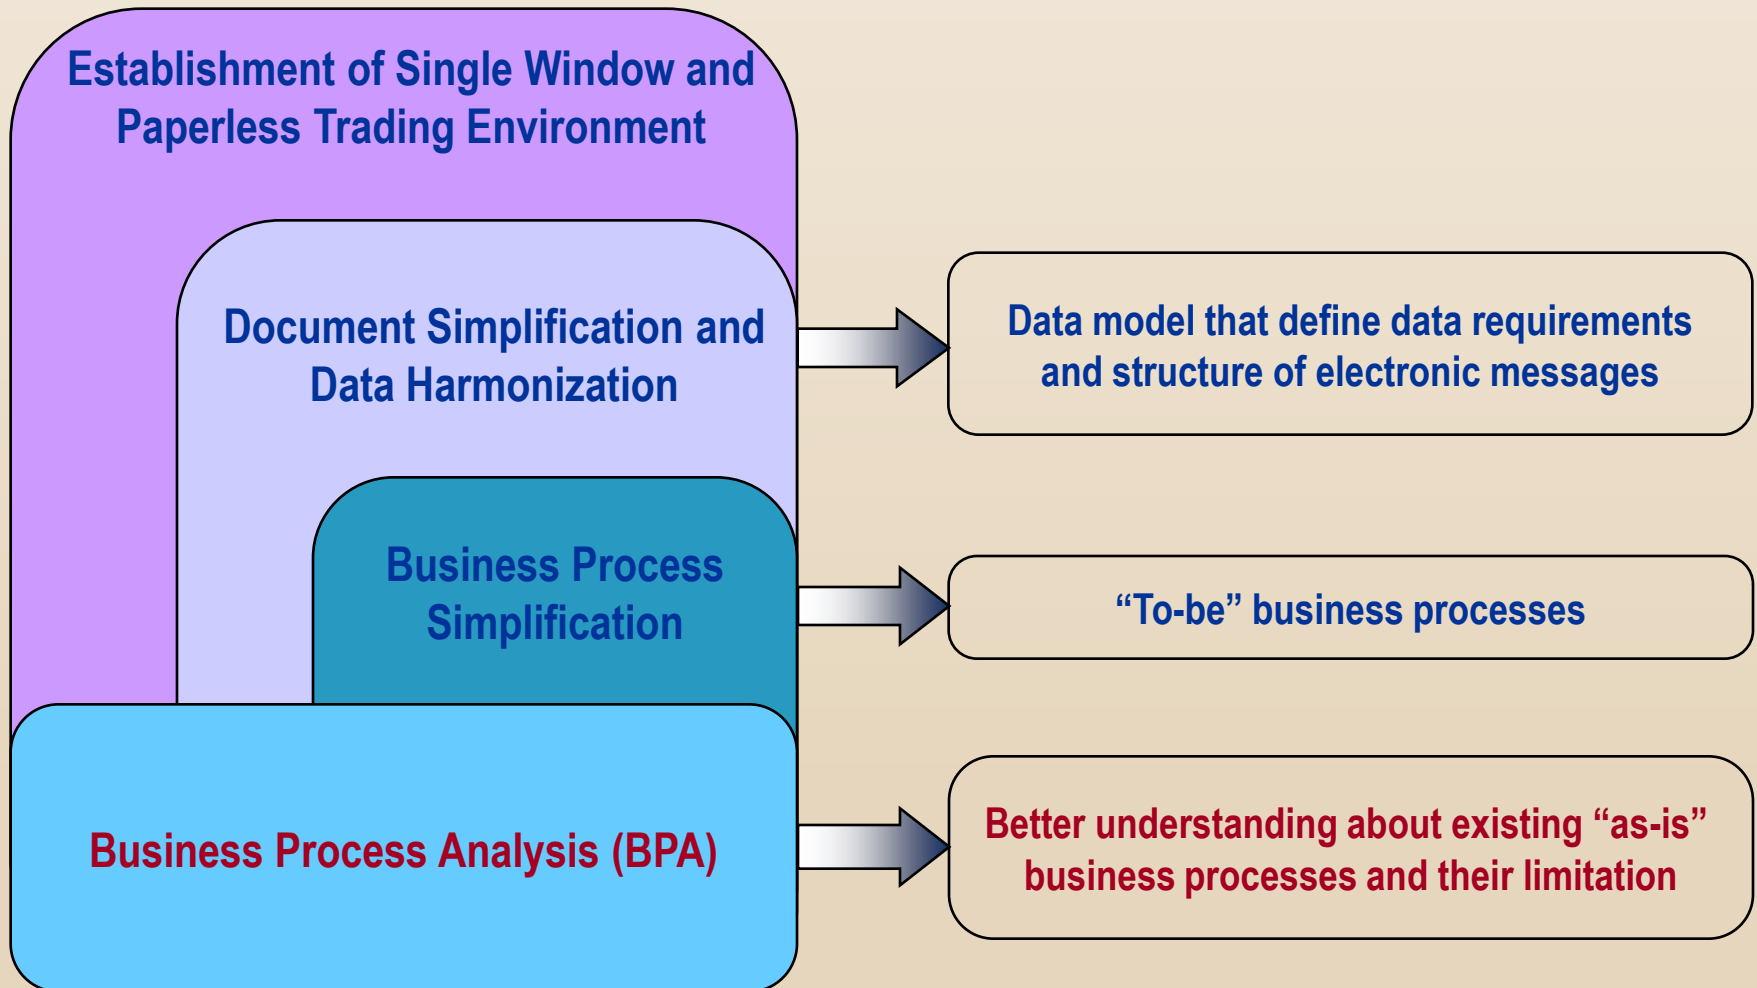

- ❖ **Step 3:** Analyze data elements across various documents and organize them in a comparable manner

- ▶ United Nations Layout Key (UNLK) Document Family
- ▶ Single Consignment V.S. Multiple Consignments V.S. Transport Equipment

- ❖ **Step 4:** Map the data elements to the reference data model

- ▶ Complies with UN/CEFACT Core Component Specification
- ▶ Covers data requirements of the international supply chain

Business Process Analysis and Single Window Development

Group Exercise: (if time permitted)

Identify bottlenecks and recommend improvement

Discuss in your small groups, and be prepared to present your findings & recommendations

- ❖ Identify and analyze one or two bottlenecks in your activity diagram(s)
- ❖ Identify improvement opportunities
- ❖ Propose your improvement recommendations and new “To-Be” Activity Diagram for improvement (check also for political, technical, and financial feasibility,

An Example: A BPA Project Execution Plan

Timeline

Work Breakdown Structure

Milestones

Month 1

Month 2

Month 3

Month 4

WBS 1

- Refine the scope of the project
- Develop the detailed plan

Several iterations of verification & validation (refinement) are needed

WBS 2

- Collect information
- Capture & Document the process
- Verify & validate the findings

WBS 3

- Analyze and identify bottlenecks
- Provide recommendations for improvement
- Review and feedback by stakeholders

WBS 4

- Wrap-up & submit the final report

WBS 5 – Administrative Support, Daily Project Tracking and Control

Commonly Agreed Plan

As-Is Report

To-Be Report

Final Report

BPA Stakeholder Review Workshop

Best wishes on your trade & transport
facilitation improvement.

Thank You.
