Strategic Master Plan for Chittagong Port Unveiled 7 September 2015: Dhaka, Bangladesh

A new master plan outlining a 25-30 year vision for Chittagong Port has been unveiled in Dhaka, Bangladesh. Development under the plan is expected to increase port efficiency and is estimated to cost around \$1.9 billion. Recommendations include: construction of three key terminals in the port area, including a container terminal on the existing general cargo berths and a new multipurpose terminal for non-container cargo; port facility on a small island in the Bay of Bengal; and expansion of hinterland links, including roads.

ADB Study Quantifies How Cross-Border Power Trading can Benefit South Asia 22 September 2015: Manila, Philippines

An ADB study has measured the economic and reliability benefits of cross-border electricity trading for countries in South Asia. Findings reveal that power trading in South Asia can not only serve the region's growing demand for energy but also save the region billions of dollars. Recommendations include a market-driven process for cross-border power trading implemented under a regulatory framework across the region.

Bangladesh Businessmen Call for Better Land Port Infrastructure **7 September 2015: Dhaka, Bangladesh**

Bangladesh businessmen envisage increased trade with India if constraints on land port infrastructure are addressed. Land ports and land Customs stations play a significant role in the country's trade within the subregion. Current limitations in infrastructure, communication, and excessive documentation create hurdles for trade efficiency.
